Chapter 1. Invited papers

Radiative processes in bulk crystalline silicon
G. Davies 1

Different Er centres in Si and their use for electroluminescent devices
W. Jantsch, S. Lanzerstorfer, L. Palmetshofer, M. Stepikhova, H. Preier 9

Understanding and control of the erbium non-radiative de-excitation processes in silicon
G. Franzò, F. Priolo, S. Coffa 19

Photoluminescence of porous silicon surfaces stabilized through Lewis acid mediated hydrosilylation
J.M. Buriak, M.J. Allen 29

Field-induced functions of porous Si as a confined system
N. Koshida, K. Ueno, X. Sheng 37

All porous silicon microcavities: growth and physics
L. Pavesi, V. Mulloni 43

The integration of nanoscale porous silicon light emitters: materials science, properties, and integration with electronic circuitry
P.M. Fauchet 53

Optical band gap of Si nanoclusters
C. Delerue, G. Allan, M. Lannoo 65

Visible light emission from Si/SiO_2 superlattices in optical microcavities
D.J. Lockwood, B.T. Sullivan, H.J. Labbé 75

Light-emitting structures based on nanocrystalline (Si/CaF_2) multiquantum wells
A.G. Nassiopoulou, V. Tsakiri, V. Ioannou-Sougleridis, P. Photopoulos, S. Menard, F. Bassani, F. Arnaud d' Avitaya 81

Chapter 2. Porous silicon

Characterization of ITO/porous silicon LED structures
K. Molnár, T. Mohácsy, P. Varga, É. Vázsonyi, I. Bársony 91

Strongly nonlinear luminescence in oxidized porous silicon films
H. Koyama, L. Tsybeskov, P.M. Fauchet 99

Local order in light emitting porous silicon studied by XEOL and TEY
G. Dalba, N. Daldosso, D. Diop, P. Fornasini, R. Grisenti, F. Rocca 103

Photoluminescence quenching of porous silicon in organic solvents: evidence for dielectric effects
S. Fellah, R.B. Wehrspohn, N. Gabouze, F. Ozanam, J.-N. Chazalviel 109

Tunability of the photoluminescence in porous silicon due to different polymer dielectric environments
H.A. Lopez, X. Linda Chen, S.A. Jenekhe, P.M. Fauchet 115

Solvent detection using porous silicon optical waveguides
H.F. Arrand, T.M. Benson, A. Loni, R. Arens-Fischer, M.G. Krueger, M. Thoenissen, H. Lueth, S. Kershaw, N.N. Vorozov 119

Light emission from porous silicon single and multiple cavities
E.K. Squire, P.A. Snow, P.St.J. Russell, L.T. Canham, A.J. Simons, C.L. Reeves 125

Improvement of the luminescence in p-type as-prepared or dye impregnated porous silicon microcavities
S. Setzu, S. Létant, P. Solsona, R. Romestain, J.C. Vial 129

Interference filters from porous silicon with laterally varying wavelength of reflection
D. Hunkel, R. Butz, R. Ares-Fisher, M. Marso, H. Lüth 133

Photoluminescence studies of porous silicon microcavities
Z.H. Xiong, S. Yuan, Z.M. Jiang, J. Qin, C.W. Pei, L.S. Liao, X.M. Ding, X.Y. Hou, X. Wang 137

Laser assisted chemical vapour deposition of silicon oxide layers
P. Paiva, F. Madelino, O. Conde 141

Comparative study of the oxidation of thin porous silicon layers studied by reflectometry, spectroscopic ellipsometry and secondary ion mass spectroscopy
M. Fried, O. Polgár, T. Lohner, S. Strehlke, C. Levy-Clement 147

Time-resolved photoluminescence study of the red emission in nanoporous SiGe alloys
S. Lebib, H.J. von Bardeleben, J. Cernogora, J.L. Fave, J. Roussel 153

X-ray photoelectron spectroscopy characterization of stain-etched luminescent porous silicon films
R. Zanoni, G. Righini, G. Mattogno, L. Schirone, G. Sotgiu, F. Rallo 159

On the morphology of stain-etched porous silicon films
L. Schirone, G. Sotgiu, M. Montecchi 163

Efficient luminescence from porous silicon
A. Daami, G. Bremond, L. Stalmans, J. Poortmans 169

Anodic oxidation of porous silicon bilayers
R. Guerrero-Lemus, F.A. Ben-Hander, J.D. Moreno, R.J. Martín-Palma, J.M. Martínez-Duart, P. Gómez-Garrido, M.L. Marcos, J. González-Velasco 173

Depth dependence of photoluminescence and chemical bonding in porous silicon
M. Sendova-Vassileva, D. Dimova-Malinovska, M. Kamenova, A. Kakanakova-Georgieva, Ts. Marinova 179

Ellipsometric study of refractive index anisotropy in porous silicon
H. Krzyżanowska, M. Kulik, J. Żuk 183

Effect of oxygen implantation on ionoluminescence of porous silicon
J. Żuk, T.J. Ochalski, M. Kulik, J. Liśkiewicz, A.P. Kobzev 187

Inelastic light scattering and X-ray diffraction from thick free-standing porous silicon films
A.V. Andrianov, G. Polisski, J. Morgan, F. Koch 193

Optical waveguides in porous silicon pre-patterned by localised nitrogen implantation
H.F. Arrand, T.M. Benson, P. Sewell, A. Loni 199

Determination of localized states in porous silicon
T. Matsumoto, J. Qi, Y. Masumoto, H. Mimura, N. Koshida 203

Application of stain-etched porous silicon in light emitting diodes and solar cells
D. Dimova-Malinovska 207

Chapter 3. Silicon and germanium nanocrystals

Dose dependence of room temperature photoluminescence from Si implanted SiO_2
S. Cheylan, N.B. Manson, R.G. Elliman 213

Size dependent photoluminescence from Si nanoclusters produced by laser ablation
L. Patrone, D. Nelson, V. Safarov, M. Sentis, W. Marine 217

Optical properties of nanocrystalline silicon thin films produced by size-selected cluster beam deposition
M.A. Laguna, V. Paillard, B. Kohn, M. Ehbrecht, F. Huisken, G. Ledoux, R. Papoular, H. Hofmeister 223

The effect of annealing under hydrostatic pressure on the visible photoluminescence from Si^+-ion implanted SiO_2 films
I.E. Tyschenko, L. Rebohle, R.A. Yankov, W. Skorupa, A. Misiuk, G.A. Kachurin 229

Excess Si concentration dependence of the photoluminescence of Si nanoclusters in SiO_2 fabricated by ion implantation
T. Shimizu-Iwayama, D.E. Hole, P.D. Townsend 235

Substrate temperature dependence of the photoluminescence efficiency of co-sputtered Si/SiO_2 layers
S. Charvet, R. Madelon, R. Rizk, B. Garrido, O. González-Varona, M. López, A. Pérez-Rodríguez, J.R. Morante 241

Cathodoluminescence properties of silicon nanocrystallites embedded in silicon oxide thin films
T. Inokuma, Y. Kurata, S. Hasegawa 247

Light emission from Si nanocrystals embedded in CaF_2 epilayers on Si(1 1 1): Effect of rapid thermal annealing
M. Watanabe, T. Maruyama, S. Ikeda 253

Ellipsometric spectroscopy study of photoluminescent Si/SiO_2 systems obtained by magnetron co-sputtering
S. Charvet, R. Madelon, F. Gourbilleau, R. Rizk 257

Light emitting diode structure based on Si nanocrystals formed by implantation into thermal oxide
N. Lalic, J. Linnros 263

Photoluminescence and paramagnetic defects in silicon-implanted silicon dioxide layers
V.Ya. Bratus', M.Ya. Valakh, I.P. Vorona, T.T. Petrenko, V.A. Yukhimchuk, P.L.F. Hemment, T. Komoda 269

Photoluminescence and electroluminescence investigations at Ge-rich SiO_2 layers
L. Rebohle, J. von Borany, W. Skorupa, I.E. Tyschenko, H. Fröb 275

The origin of photoluminescence in Ge-implanted SiO_2 layers
H.B. Kim, K.H. Chae, C.N. Whang, J.Y. Jeong, M.S. Oh, S. Im, J.H. Song 281

Defect versus nanocrystal luminescence emitted from room temperature and hot-implanted SiO_2 layers
J.Y. Jeong, S. Im, M.S. Oh, H.B. Kim, K.H. Chae, C.N. Whang, J.H. Song 285

Chapter 4. Rare earth in silicon and related materials

Excitation mechanism of Er in Si studied with a free-electron laser
T. Gregorkiewicz, D.T.X. Thao, I. Tsimperidis, H.H.P.Th. Bekman, C.J.G.M. Langerak, J. Michel, L.C. Kimerling 291

EPR study of erbium-impurity complexes in silicon
J.D. Carey, R.C. Barklie, J.F. Donegan, F. Priolo, G. Franzò, S. Coffa 297

The influence of oxygen on the lattice sites of rare earths in silicon
U. Wahl, A. Vantomme, G. Langouche, J.G. Correia 303

1.54 μm Light emission from Er/O and Er/F doped Si p–i–n diodes grown by molecular beam epitaxy
W.-X. Ni, C.-X. Du, K.B. Joelsson, G. Pozina, G.V. Hansson 309

Excitation cross-section and lifetime of the excited state of erbium ions in avalanching light-emitting Si : Er : O diodes
N.A. Sobolev, Yu.A. Nikolaev, A.M. Emel'yanov, K.F. Shtel'makh, P.E. Khakuashev, M.A. Trishenkov 315

Characteristics of surface and waveguide emitting SiGe : Er : O diodes
A. Sticht, E. Neufeld, A. Luigart, K. Brunner, G. Abstreiter, H. Bay 321

Er-doped edge emitting devices with a SiGe waveguide
C.-X. Du, W.-X. Ni, K.B. Joelsson, F. Duteil, G. Hansson 329

Room-temperature electroluminescence from erbium-doped amorphous hydrogenated silicon
O.B. Gusev, M.S. Bresler, E.I. Terukov, K.D. Tsendin, I.N. Yassievich 335

Luminescence properties of Er^{3+} in SiN/PS : Er
S. Uekusa, T. Inomata 339

Electrical and optical analyses of Er-doped silicon grown by liquid-phase epitaxy
A. Cavallini, B. Fraboni, S. Pizzini, S. Binetti, L. Lazzarini, G. Salviati 343

Erbium-doped silicon epilayers grown by liquid-phase epitaxy
S. Binetti, A. Cavallini, A. Dellafiore, B. Fraboni, E. Grilli, M. Guzzi, S. Pizzini, S. Sanguinetti 347

1.54 μm Emission of pulsed-laser deposited Er-doped films on Si
S. Lanzerstorfer, J.D. Pedarnig, R.A. Gunasekaran, D. Bäuerle, W. Jantsch 353

Dislocation-related luminescence in Er-implanted silicon
N.A. Sobolev, O.B. Gusev, E.I. Shek, V.I. Vdovin, T.G. Yugova, A.M. Emel'yanov 357

EXAFS analysis of Er sites in Er–O and Er–F co-doped crystalline Si
A. Terrasi, F. Priolo, G. Franzò, S. Coffa, F. D'Acapito, S. Mobilio 363

Visible and infrared photoluminescence from Er-doped SiO_x
J. Wan, C. Sheng, F. Lu, S. Yuan, D.W. Gong, L.S. Liao, Y.L. Fang, F. Lin, X. Wang 369

New efficient mechanism of excitation of electroluminescence from erbium ions in crystalline silicon
M.S. Bresler, O.B. Gusev, P.E. Pak, N.A. Sobolev, I.N. Yassievich 375

Erbium in silicon–germanium quantum wells
A.T. Naveed, M.Q. Huda, K.F. Abd El-Rahman, J. Hartung, J.H. Evans-Freeman, A.R. Peaker, D.C. Houghton, C. Jeynes, W.P. Gillin 381

Optical properties of neodymium incorporated in porous silicon
R. M'ghaïeth, J.C. Vial, M. Haouari, H. Maâref 387

A comparative study of donor formation in dysprosium, holmium, and erbium implanted silicon
V.V. Emtsev, V.V. Emtsev Jr, D.S. Poloskin, E.I. Shek, N.A. Sobolev 391

Luminescence from porous silicon doped with erbium–ytterbium complexes
V.V. Filippov, V.V. Kuznetsova, V.S. Homenko, P.P. Pershukevich, V.A. Yakovtseva, M. Balucani, V.P. Bondarenko, G. Lamedica, F. Ferrari 395

On the origin of 1.5 μm luminescence in porous silicon coated with sol–gel derived erbium-doped Fe_2O_3 films
N.V. Gaponenko, A.V. Mudryi, O.V. Sergeev, M. Stepikhova, L. Palmetshofer, W. Jantsch, J.C. Pivin, B. Hamilton, A.S. Baran, A.I. Rat'ko 399

Chapter 5. Si-based alloys, multilayers and hydrogenated a-Si

a-SiO_x : H thin film light emitting devices for Si-based optoelectronics
M.C. Rossi, S. Salvatori, F. Scrimizzi, F. Galluzzi, R. Janssen, M. Stutzmann 405

Optical properties of Si/CaF_2 superlattices
E. Degoli, S. Ossicini 411

Amorphous Si/insulator multilayers grown by vacuum deposition and electron cyclotron resonance plasma treatment
J.-M. Baribeau, D.J. Lockwood, Z.H. Lu, H.J. Labbé, S.J. Rolfe, G.I. Sproule 417

Radiative emission properties of a-SiN : H based nanometric multilayers for light emitting devices
F. Giorgis, C.F. Pirri, C. Vinegoni, L. Pavesi 423

Scattering-controlled recombination of Δ_2-light-hole indirect excitons and apparently enhanced quantum confined Stark effect in tensilely strained $Si_{1-y}C_y/Si$ (0 0 1) quantum wells
S. Fukatsu, Y. Sugawara, D. Hippo, K. Brunner, K. Eberl 429

Ultrafast carrier dynamics in wide gap hydrogenated amorphous silicon
J. Kudrna, P. Malý, F. Trojánek, I. Pelant, J.Kočka, A. Poruba, S. Surendran, J. Jiřička 435

Visible photoluminescence from a-Si : H/SiO_2 superlattices fabricated by UHV evaporation
K. Nishimoto, D. Sotta, H.A. Durand, K. Etoh, K. Ito 439

Strong visible photoluminescence in amorphous SiO_x and SiO_x : H thin films prepared by thermal evaporation of SiO powder
H. Rinnert, M. Vergnat, G. Marchal, A. Burneau 445

Visible photoluminescence and its mechanisms from a-SiO_x : H films with different stoichiometry
R.B. Wehrspohn, M. Zhu, C. Godet 449

XPS investigation of a-Si : H thin films after light soaking
A. Toneva, Ts. Marinova, V. Krastev 455

Chapter 6. Light emitting silicides

Growth and structural characterization of semiconducting Ru_2Si_3
D. Lenssen, H.L. Bay, St. Mesters, C. Dieker, D. Guggi, R. Carius, S. Mantl 461

Correlation between structural and optical properties of ion beam synthesized β-$FeSi_2$ precipitates in Si
M.G. Grimaldi, S. Coffa, C. Spinella, F. Marabelli, M. Galli, L. Miglio, V. Meregalli 467

Fabrication of p-Si/β-$FeSi_2$ balls/n-si structures by MBE and their electrical and optical properties
T. Suemasu, T. Fujii, M. Tanaka, K. Takakura, Y. Iikura, F. Hasegawa 473

Electronic and optical properties of semiconducting iron disilicide
A.B. Filonov, V.E. Borisenko, W. Henrion, H. Lange 479

Chapter 7. SiGe structures and Ge islands

Room-temperature SiGe light-emitting diodes
L. Vescan, T. Stoica 485

C-induced Ge dots: enhanced light-output from Si-based nanostructures
O.G. Schmidt, K. Eberl, J. Auerswald 491

Luminescence from Si-$Si_{1-x}Ge_x$/$Si_{1-y}C_y$-Si structures
K.B. Joelsson, G. Pozina, W.-X. Ni, C.-X. Du, G. Hansson 497

Photoluminescence and X-ray characterisation of Si/$Si_{1-x}Ge_x$ multiple quantum wells
T.P. Sidiki, A. Rühm, W.-X. Ni, G.V. Hansson, C.M. Sotomayor Torres 503

Short period $(Si_6Ge_4)_p$ superlattices: photoluminescence and electron microscopy study
N. Pinto, F. Tombolini, R. Murri, M. De Crescenzi, M. Casalboni, G. Barucca, G. Majni 509

Photoluminescence of Ge nanostructures grown by gas source molecular beam epitaxy on silicon (1 1 8) surface
M. Serpentini, A. Souifi, M. Abdallah, I. Berbezier, G. Bremond 515

Chapter 8. Other light emitting structures

Black-body emission from nanostructured materials
P. Roura, J. Costa, M. López-de Miguel, B. Garrido, J. Fort, J.R. Morante, E. Bertran 519
